About

Frontend developer with experience building web applications from architecture to deployment. Seeking opportunities to gain commercial experience in a product-driven team.

Tech Stack

- **Frontend:** React, Next.js, TypeScript, Redux, RTK Query, React Router
 - **Styling:** Tailwind CSS, SASS, CSS, Ant Design, Framer Motion
 - **Tools:** Git, REST API, Figma
 - **Testing:** Jest
 - **Additional:** Node.js, Express, MongoDB
 - **English:** B2
-

Projects

Soundify — Music Streaming Platform

React, TypeScript, Redux, Node.js, Express, MongoDB, HLS

Full-featured music streaming platform with audio delivery system.

- Implemented **HLS streaming** with server-side audio conversion to multiple formats
- Built user and artist dashboards with subscription system
- Developed admin panel, recommendation engine, charts, and analytics
- **JWT authentication**, BackBlaze B2 integration for file storage

SnapURL — URL Management Dashboard

Next.js 14, TypeScript, Context API, Recharts

Administrative dashboard for short link management with advanced analytics.

- **Role-based access control** (Admin, User, Demo)
- **Real-time click tracking** with geographic visualization
- **Bulk operations** (import/export up to 100 URLs), QR code generation
- Search with debouncing, dark/light themes
- Covered functionality with tests (Jest) and **accessibility testing**

AirPods Max Landing Page

Next.js 14, TypeScript, Framer Motion, Tailwind CSS

Product landing page focused on animations and UX.

- Smooth **scroll animations** powered by Framer Motion
- Interactive elements with hover effects and transitions
- **Fully responsive** design across all devices

Education

Belarusian State University of Informatics and Radioelectronics

Design and Production of Software-Controlled Electronic Systems

September 2023 — June 2027 | 3rd year

Additional

- All projects built independently from scratch — from architecture to deployment
- Quick learner with new technologies and tools
- Meet deadlines, able to plan development cycles
- Interested in modern web application architecture patterns
- Eager to grow in a team environment with code reviews and mentorship
